dess akustik featuring VIABLUETM cables and cable lifters

A First Class Listening Experience since 2001

For over two decades, VIABLUETM represents high-end quality from Germany. Combining innovative technologies with a unique design philosophy, we continue to set premium standards. Advanced manufacturing methods and exclusive materials guarantee utmost precision.

Handcrafted cables, perfectly balanced with silver-plated strands, connectors with patented full-metal housings, our AIR technology, or the VIABLUETM Ultragrip coating: Our products receive praise and recognition worldwide. The enthusiasm of our customers drives us to constantly push boundaries to meet the highest standards in quality, functionality, and design.

Made in Germany

VIABLUTM products are carefully crafted from highest quality materials. In our cables, we only use oxygen-free copper with a purity of 99.99%. When we develop our products, our goal is to create an outstanding listening experience, providing you with the best sound and image quality for every setup such as listening rooms or home theaters.

Through numerous listening sessions, we test various techniques and combine innovative ideas and materials. Our extensive experience, coupled with new approaches and attention to detail, enables us to create a remarkable form of music transmission for our customers.

We love what we do

VIABLUTM cables are handcrafted in Malsch, Germany. We're happy to create uniquely customized cables for you, tailored to your individual lengths and configurations, according to your preferences.

We love music. We love movies. We love what we do. We work with a great passion for detail, from our production to the assembly of each cable. After comprehensive quality controls, all of our products are packaged and sealed in-house.

VIABLUETM Splitters and Ferrite Filters

VIABLUETM Splitters provide an intelligent and precise cable routing and thus prevent cable strands from damages.

VIABLUETM Ferrite Filters suppress the amount of high frequency electromagnetic interference (EMI) noise found in electronic circuits.
